

From BCC 22.04.24

Hi Peter

The Structures Team are confirming what they believe is required and estimating the cost of a replacement. This will ensure we have a common understanding of the scope of works and the costs associated.

Could you forward the quote to me for the steel bridge? I will forward it on to the Structure Team.

Currently, the Structures Team can't find any as constructed drawings for the footings of the bridge, just design drawings. I believe you mentioned that you have "as constructed" drawings for the bridge. Would it be possible to forward the plans to me and I will pass them to the Structure Engineers. They can then use the detail in the "as constructed drawings" to confirm the capacity of the foundations and not use assumption based on existing load.

Kind regards

Greg Tucker
